NIM : 2231740035

Kelas : 3A-TI LMJ

Tugas : UTS

The image displays two screenshots of the TryHackMe website interface. The top screenshot shows the 'Learn' page, which features a navigation bar with 'Dashboard', 'Learn', 'Compete', and 'Other' options. The main content area highlights '900+ Hands-on Labs' and '350+ Cyber Security Challenges'. A 'Cyber Security Learning Roadmap' section is visible, with a sub-navigation bar including 'Learning Paths', 'Cloud Training', 'SOC Simulator', 'Modules', 'Rooms', and 'Networks'. The bottom screenshot shows the 'Hydra' room page, which includes a description of the tool, a 'Join Room' button, and a video player showing a 'TryHackMe Hydra Official Walkthrough'.

Task 1 Hydra Introduction

Task 2 Using Hydra

Start the AttackBox by pressing the **Start AttackBox** button at the top of this page. The AttackBox machine will start in Split-Screen view. If it is not visible, use the blue **Show Split View** button at the top of the page.

Press the green **Start Machine** button below to deploy the machine attached to this task, then navigate to <http://10.10.84.248> on the AttackBox (this machine can take up to 3 minutes to boot)

Start Machine

Hydra Commands

The options we pass into Hydra depend on which service (protocol) we're attacking. For example, if we wanted to brute force FTP with the username being `user` and a password list being `passlist.txt`, we'd use the following command:

```
hydra -l user -P passlist.txt ftp://10.10.84.248
```

For this deployed machine, here are the commands to use Hydra on SSH and a web form (POST method).
